

## How to Use Zoom Webinar with Virtual Attendance

With a PC, Mac, iPad, iPhone or Android device, you can “attend” meetings remotely using Zoom Webinar. You can watch, listen and participate from your PC or mobile device, and receive CE credit. To receive CE credit, **you must use both video and audio** during the webinar (audio only will not be eligible). To satisfy the monitoring requirements for CE, **webinar participants will be polled with questions** during the presentation to monitor attendance. Use of a headset is preferred.

To use Zoom Webinar, select the option “Virtual Attendance” from the meeting webpage or email. When prompted, follow the instructions on the Registration page. Once submitted, you will receive a confirmation email with instructions on how to access the webinar on the date/time specified, and a link to add the event to your calendar. [Watch this video from Zoom to see an example of this process.](#)
